ASTON

arper

Aston

Strong and decisive, Aston sits at the head of the table. Defying the conventions of the typical boardroom chair or executive lounge, its linear profile and aerodynamic lines are engineered for comfort and performance. With mechanics sheathed in its sleek form, Aston is ergonomic yet light, making it perfect for both home and work. Especially designed for work environments and applications, Aston is available in three different back heights – Conference, Office and Direction – covered in leather or fabric in a wide range of colors. All models are available in four-way base with swivel mechanism, automatic seat repositioning mechanism and tilt adjustment or five-way base with castors and height-adjustment mechanism. The Conference model is available in four-leg base or cantilever chrome base. The Office and Direction models are offered with a synchronized adjustment. The Aston Lounge features a four-way base with a swivel mechanism or an automatic seat repositioning mechanism. Designed especially for waiting and lounge areas, the Aston Lounge has an upholstered footrest and side table.

Designer

Jean-Marie Massaud

A multi-disciplinary practice devoted to brand, architecture, industrial and furniture design, Studio Massaud was founded in 1996 by Jean-Marie Massaud and Daniel Pouzet. Massaud's aesthetic is characterized by the quest for synthesis, lightness, and transparency and the reduction of the superfluous. The studio is an incubator for visual ideas that explore the delicate balance between to the physical environment and the economic realities of contemporary experience. Studio Massaud is the author of many of our collections such as Aston, Sean, Fred and Ginger.
