MAINTENANCE OF THE UPHOLSTERY

To keep the furniture in an optimal state for as long as possible, it is important to regularly clean the upholstery, this ensures the upholstery stays beautiful as long as possible and elongates the lifespan of the fabric. House dust and grime makes the fabric wear quicker when the furniture is used normally.

CLEANING

Vacuum the surrounding of the furniture or accessory regularly, ideally every week, where needed at half power. Wipe the product with a dry cloth or a fully wrung damp cloth. If you vacuum the product itself make sure to use a brush extension with soft hairs.
