black**der linoleumhersteller informiert**

wie bei fast allen oberflächenmaterialien besteht die möglichkeit, dass muster aus verschiedenen produktionen kleine farbunterschiede aufweisen. diese tatsache ist bei eventuellen nachbestellungen zu berücksichtigen.

während der letzten phase des produktionsprozesses kann ein gelblicher schleier, der sogenannte trockenkammerfilm, auf der oberfläche entstehen. dieser ist insbesondere bei hellen farben sichtbar, verschwindet aber bei tageslichteinwirkung völlig, und das linoleum erhält seine originalfarbe. die dauer dieses prozesses hängt von der vorherrschenden lichtintensität ab.

die farbdarstellung

kann abhängig von druckereinstellungen oder bildschirmdarstellung vom originalfarbton abweichen.
