

Alisea / Chair Design / Alessandro Stabile

Test
EN581-1 / EN581-2

The Alisea contract seating collection, just like the wind, immediately evokes functional characteristics, such as lightness and essentiality. The airy texture of the metal seat and the visual regularity of the backrest rods recall the fluidity and movement of the wind. This design strongly merges two aesthetic languages, the metal sheet one and the rod one, expressing a sense of freedom and spontaneity. The Alisea collection combines two technologies and two different techniques: curved rod and expanded metal. Available with and without armrests. Alisea is proposed as a functional solution for street contract settings, easily matching various styles of such environments for its design and its wide colour range.

Description

Code: **1406**
Typology: **Chairs**
Collection: **Alisea**

Stackable: 8
Static Load: 200 Kg
Test: EN581-1 / EN581-2
Seat Height: 45 cm

Technical Info

Width: **53 cm**
Depth: **55 cm**
Height: **79,5 cm**
Weight: **4.8 Kg**
Static Load: **200 Kg**

Packaging

Packages: **1**
Pieces for pack: **4**
Dimensions: **101x70x62 cm**
Volume: **0.438 mc**

Polyethylene bag and cardboard box

Materials

Steel

Iron and carbon alloy, with carbon content below 2%, treated to withstand the elements with the unique EMU-Coat anti-corrosion process.

Maintenance: To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.
