

TECHNICAL SPECIFICATION

SHELF SYSTEM

STACKED

“How to be specific and generic altogether? Shelving systems have a tendency to achieve one concern but never both. We decided to dimension shelving units based on the generic measurements of things to store and display while allowing for them to be combined according to specific needs and desires. The result can be at times a random stack of boxes or a coordinated grid of efficient storage... or both!” JDS Architects on the design.

PROCESS	White cubes: Every side is cut out of MDF, assembled, glued together and painted with 3 layer of PU lacquer. Pine and ash cubes: Every side is cut out of MDF with pine or ash veneer on top, then assembled and glued together.		
DESIGNED BY / YEAR OF DESIGN	JDS Architects / 2008		
TYPE	Stackable shelf system		
OPTIONS	With or without backboard		
DESCRIPTION	The Stacked system by JDS Architects provides a storage solution with infinite potential. Using small clips you can arrange the generic building blocks as you see fit to quickly create shelf systems, room dividers or side tables.		
ENVIRONMENT	Indoor / Free standing or wall mounted		
MODULE DIMENSIONS (CM)	Small:	W 21,8	D 35 H 43,6
	Medium:	W 43,6	D 35 H 43,6
	Large:	W 65,4	D 35 H 43,6
	Stacked Clips:	W 4	D 2 H 4
MATERIAL	MDF ash veneer and pine veneer		
COLOUR / REFERENCE CODE	Stacked:	White: RAL 9016 Pine Ash	
	Clips:	Green White Yellow	
CLEANING INSTRUCTION	Remove dust from shelves with a soft cloth or remove abrasive dust particles. When necessary clean with moist cloth. For wood veneer finishes, dry immediately with soft cloth following wood grains. The wood should not be subjected to excessive heat, direct sunlight or humidity.
