GRID

WWW.CPHLIGHTING.DK

Design : Tom Stepp - 2011

Grid combines modern design with reference to the classic Scandinavian design tradition. The idiom of Grid is a refined interpretation of the traditional industrial lamps.

The grid adds a twist to the design of the lamp and prevents nosy fingers from touching the bulb.

Grid is suitable for both private and public applications - single or in clusters.

Pendant : ø17.5 , H25cm

E27 , 230V max 40W
