EGGY POP

EGGY POP

Design : G. Berchicci - 2005

Inspired by the world of insects and his humoristic approach to the design process the renowned architect Guglielmo Berchicci has designed an original and beautiful collection of lighting based on a simple shape - the egg. Eggy Pop lamps emit a soft and pleasant light without glare. The diffusers are made of PE (white) - a strong, UV-resistant and recyclable material. Mounted on different fittings they fulfill various lighting requirements in private as well as commercial interiors.

Eggy Pop In / Out / Up / Pendant :

ø32, H22cm*
